

City of Lynnwood  
Department of Fire Prevention

The following is a list of companies which have met the City of Lynnwood Fire Marshal's standards for an approved Central Monitoring Station (CMS). The City has a proactive approach to fire prevention and values balancing the investments of the business community, the expectations of the citizens and visitors and the applicable codes and standards. We believe that prevention is preferable to response and is a key guiding principle.

The currently adopted International Building and Fire Codes, NFPA, Washington State law, local ordinances (LMC Title9), other applicable standards/laws and administrative interpretations by the Fire Marshal govern the way in which fire protection is accomplished in the City of Lynnwood. The CMS is a vital part of the fire protection system. In concert with construction methods, monitored fire protection systems provide early detection and response, minimizing life hazards and building loss.

These companies comply with the City's current Fire Alarm Requirements, have provided a copy of the current UL 827/FM 3011 certificate of compliance for each CMS location and copy of the written procedure for communicating with the CMS, have current City and State business licenses, and have agreed to report all alarm, supervisory, and trouble signals still unrestored after 24 hours and to provide disconnection notice to the City.
